

Migration to Salesforce Lightning

ZERO DATA LOSS, FASTER ADOPTION, CUSTOM LIGHTING COMPONENTS

Lightning Experience is more than a revamped UI. It is the future of Salesforce. Lightning is revolutionizing the CRM space by enabling organizations to run efficient and consistent operations, make better decisions, and sell faster. Einstein powers Lightning, making it probably the only CRM in the world that not only accepts commands but also suggests the next course of action. You can benefit from this next-gen CRM if you migrate to it.

Migrating to Lightning Experience is not a point-and-click job. The effort involved is significant, but the benefits are immense. Consider partnering with Grazitti Interactive if you are seriously thinking about migrating Sales Cloud, Service Cloud, Community Cloud, and/or Knowledge to Lightning.

Reasons to Partner with Grazitti

Having successfully migrated Salesforce orgs for 50+ organizations, we are a Salesforce partner that can ensure:

- **Rapid Migration:** Our fastest migration job took fewer than 200 hours.
- **Zero Data Loss.:** All your data—to the last byte—is successfully moved.
- **Custom Component Development:** We code new components when a Classic feature you rely upon is not available in Lightning.
- **Customizations:** Your users notice little or no difference in UX or UI.
- **Quality Assurance:** Rigorous testing guarantees that your Lightning platform is capable of meeting your business objectives.
- **High Adoption Rate:** Pedagogically-sound trainings increase Lightning adoption.

We Migrate

- Sales Cloud
- Service Cloud
- Knowledge
- Community Cloud

Our Proven Process

About Us
