

# Alteryx Custom Connectors

CONNECT ALTERYX WITH MULTIPLE CLOUD PLATFORMS

While 90% of data has been generated in just the last two years, most of it never gets analyzed.

With rapid growth in the number of platforms, there is a need to have unified access to metrics from multiple platforms. Alteryx has been redefining self-service analytics for businesses.

Grazitti's Alteryx connectors help you perform effective analyses and fetch data from different platforms ranging from databases and social media to online advertising and more.

## Key Features

-  **Effortless Installation:**  
Download a connector & get started in a few clicks
-  **Quick Connectivity:**  
Log in with your credentials & start fetching data.
-  **Native Connectors:**  
Ensure seamless connectivity with a robust infrastructure

**“**Our company started using Grazitti's connector to pull data from Bing Ads daily. By using this connector, we are able to grab the most recent data, monitor our accounts, analyze, and optimize our campaigns everyday. The product's quality and price are beyond my expectation and most importantly, they are quick to respond to my questions. Definitely recommend!!

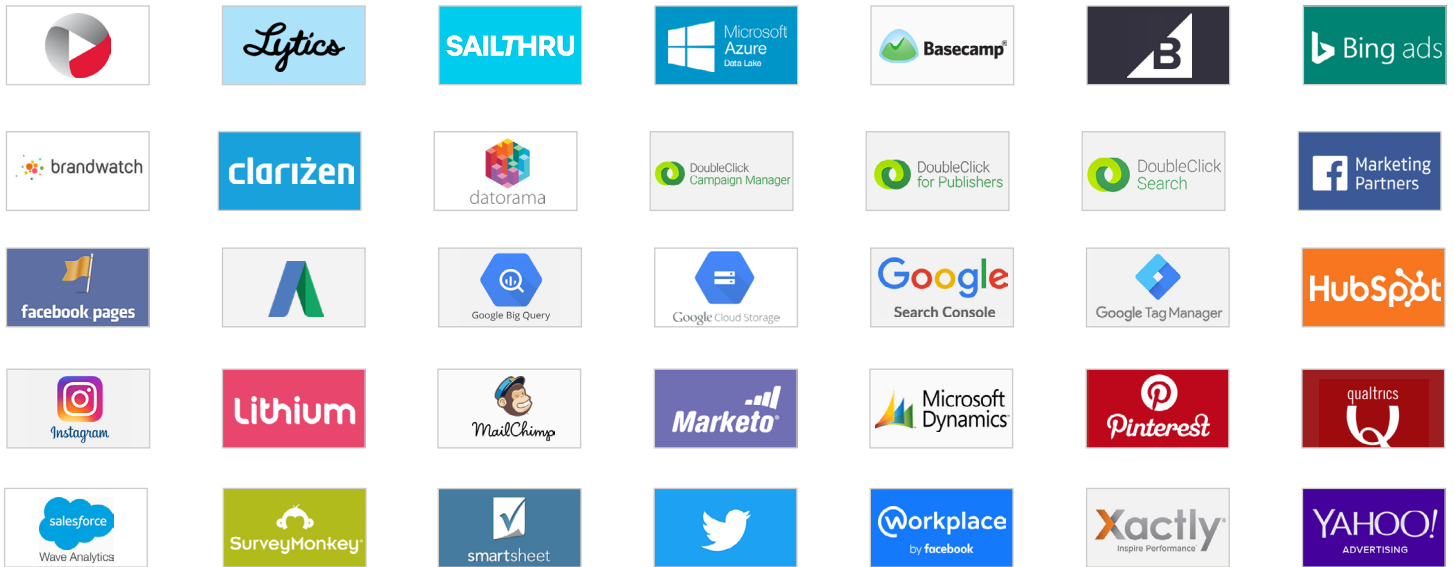

**Stacy Wu**  
Marketing Analyst  
MQ&C Digital

**“**Grazitti is very easy to work with, gets things done quickly and always on point for whatever we need. We also know when issues come up, support is always ready to jump on the phone call and sort things out right away.
