Grazitti Interactive®
Marketing for Digital Natives

Human Resource Analytics

OPTIMIZE THE BILLING PROCESS, ENHANCE THE QUALITY OF HEALTHCARE, ASSESS PROVIDER PERFORMANCE AND UTILIZATION, AND IMPROVE PATIENT EXPERIENCE.

Human Resource Analytics helps health centers index and evaluate key performance indicators. This includes determining the relevance, efficiency, effectiveness, impact, and sustainability of human resource planning as well as achievements.

Our team of experts can help you track the movement of indicators towards predetermined objectives and construct a broader view of health center and workforce performance.

What Grazitti Offers

Core Quality Summary
Boost Provider's morale to deliver effective, safe, efficient, patient-centered, equitable, and timely care

Time and Attendance Management
Tracking doctors availability schedule by Dept., multi Dept. utilization rate by doctor/other staff, temp vs permanent manpower (with service duration)

Appointment Optimization
Analyzing appointments pattern, utilizing EMR, by hour, Dept & Provider, Post-Treatment metrics – Appt. reschedule status, or transferred to other department, etc.

Human Capital & Performance Analytics
Tracking employees' performance, learning, rewards, investment, etc, enabling Health Centers to make quicker and informed decisions and more

Vendor Cost Analytics
Help Health Centers better understand their vendor's work and its impact on business to optimize vendor based expense and cut down on non-productive vendor activities

Workforce Utilization
Tracking time spent on each patient by a provider and other staff, enabling Health Center to better manage the patient flow
